ONLINE INTEGRATION - WE GET TO KNOW EACH OTHER BETTER - DIGITAL EDUCATION

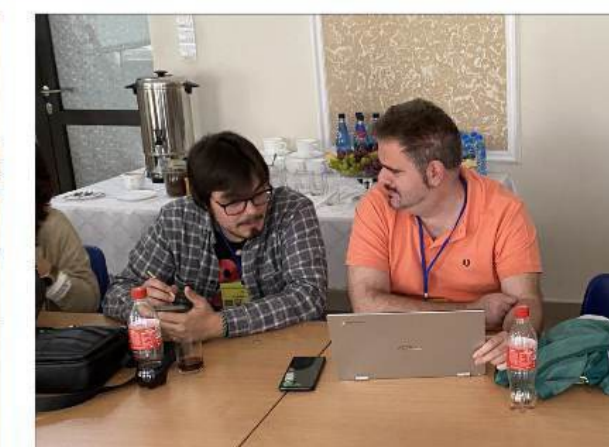

Throughout the duration of the project, youth and guardians participating in the project integrated with each other online through available platforms and Internet applications, including the Zoom Platform, Skype Microsoft Teams, Facebook Messenger, Viber and Google Meet. Using IT and computer tools, including: Canva, Krita, Movavi Video Editor + 2021, Jamboard, Padlet, a number of digital workshops were conducted, good environmental and ecological practices of partner organizations were familiarized with, and through intercultural dialogue partner organizations presented cultural resources, historical and natural in local, regional and national terms.

KA 210-YOU - ERASMUS+ SMALL SCALE PARTNERSHIPS IN THE YOUTH SECTOR

Project management - International project meeting EcoLogical 2022 - 16/17.06.2022 - Poland. On the premises of the leading organization, the Foundation for International Economic, Cultural and Tourist Integration, an international two-day project meeting was held with the participation of 8 people representing the organizations participating in the project, two people from each organization. For reasons beyond our control (cancelled flights), representatives of organizations from Italy were absent from the meeting.

The Italian partner organization was keeping in touch with participants in Poland and was updated with the project activities via online tools. The meeting was of a working nature in order to implement and coordinate the project. It was a kick-off meeting, during which the project was discussed in detail, the project tasks were divided. During the mobility, 3 workshop sessions were held: Session I - Models of effective management; Session II - Non-formal methodology in the implementation of project activities. Discussion of good methodological practices; Session III - Effective promotion and advertising of project activities. Sessions were conducted with non-formal methods.

IMPLEMENTATION OF THE PROJECT - ART AND DIGITAL COMPETITION „ZERO WASTE 5R”

The art and digital competition „Zero Waste 5R” has become a dissemination of knowledge among project participants about ecological attitudes and behavior in order to reduce the amount of waste in our environment. In addition, it broadened knowledge in the field of nature and ecology and developed digital competences. The 5 R rule, or 5 steps to being zero waste. Refuse or SAY NO; Reduce, or LIMIT YOURSELF; Reuse, or USE AGAIN; Recycle, or SEGREGATE YOUR WASTE; Rot means COMPOST. Young people from partner organizations developed the Regulations of the competition and its poster.

II DAY OF THE INTERNATIONAL MEETING IN POLAND

During the second day of the International Meeting in Poland - June 17, 2022, the project group met with the Head of the Stoczek Łukowski Commune and got acquainted with the ecological and natural activities of the local government and participated in a discussion on environmental education with school principals from the Stoczek Łukowski Commune. They got to know the local history and culture - including the history of the Battle of Stoczek and the figure of General Józef Dwernicki, they got acquainted with the importance of the Jata and Kulak Reserves. Moreover, a thematic trip to the green Nature Park in Kozłówka was organized in order to get familiar with the plant diversity and landscape architecture of the green space.

PROJECT IMPLEMENTATION - SOCIAL CAMPAIGN - OUR ECOLOGICAL PHOTOCAST

During the project, young people, using their knowledge of nature, including ecological knowledge, designed a number of posters related to the promotion of ecological behavior and attitudes in the social environment of local communities of project partners in the field of waste management, especially its segregation, proper use of water and energy.

PROJECT IMPLEMENTATION - OUR ECOLOGICAL PATROL

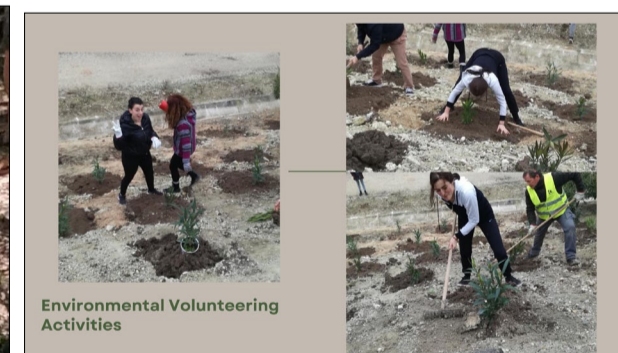

In the areas of local communities of organizations participating in the project, young people patrolled areas related to non-compliance with regulations related to the protection of nature and the environment. It counteracted the pollution of public places, disciplined residents, controlled green areas in terms of devastation, collection and disposal of waste, compliance with duties by dog owners.

IMPLEMENTATION OF THE PROJECT - GREEN SPACE - WE PLANT SHRUBS AND TREES

Young people participating in the project with the participation of the social environment, especially the school, carried out a number of tree planting actions in the local area, each partner organization, together with the state forest institution or a natural and ecological organization. Deciduous and coniferous trees were planted in appropriate places in the local communities of partner organizations.

IMPLEMENTATION OF THE PROJECT ACTION IN THE FIELD OF EDUCATION, TEACHING AND LEARNING DIGITAL JOURNALISTS

During the four days of the meeting in Poland, young people participating in the project and facilitators, youth guardians, in the field of education, teaching and learning, communed with the art of press journalism, created texts with a specific function, used appropriate Internet and IT tools. They deepened their knowledge: in the field of basic models and ways of organizing press editorial offices, about journalistic professions, about forms and genres of press expression and formats on the press market. They discussed the topic - Can you make money by writing? About the work of a copywriter. SEO rules. How to make money copywriting. Digital workshops were conducted using active methods, relating to the work of a press journalist, the development of texts and graphic designs. It is planned to develop an ecological, natural and design magazine. Young people developed language and digital competences, initiative and creativity. Cooperation in a group, problem solving, learning from each other and international integration are the basic elements of project activities every day. In addition to journalistic activities, project participants deepened their knowledge in the field of nature and ecology, discovering the resources of Nałęczów, Kazimierz Dolny and Warsaw.

MUSEUM CLASSES AT THE POLISH ACADEMY OF SCIENCES MUSEUM OF THE EARTH IN WARSAW

During the international meeting in Poland, young people with guardians from Poland, Turkey, Italy, Slovakia and Spain participated in museum activities, deepening their knowledge in the field of: minerals and rocks, geology and mineral resources of Poland, volcanoes and earthquakes, what did the glacier leave us? landscape sculptors - from the mountains to the sea, are we facing a deluge? How do we know when it was? So how do we measure time in geology?, rocks and fossils as documents of the history of the Earth, plants of the Carboniferous forest, when palm trees grew in Poland?, secrets of trees - among relics and living fossils, when elephants lived in Poland, the origin of man, we are all one family, on evolution and systematics of organisms, properties of amber. Particular attention was paid to the Łuków ammonites - in the vicinity of Łuków, the earth hides an extraordinary geological peculiarity, unique in Europe and even in the world. Among the typical post-glacial tills, isolated patches of black clays from the Jurassic period occur shallowly below the ground surface. They are much older than the surrounding clays, their age is estimated at about 165 million years! It is believed that the ice sheet moved them to Łuków from northern Europe, perhaps from the area of present-day Estonia. The loams were transported almost intact. They contain huge amounts of Jurassic fossils (including ammonites), which have been preserved in excellent condition. They are the object of collector's quest.

DISCOVERING THE NATURAL AND ECOLOGICAL RESOURCES OF THE CITY OF NAŁĘCZÓW

The project group organized a thematic trip to Nałęczów to get to know the Spa Park, founded by Stanisław Małachowski, with a rich 190-year-old tree stand, a palm house and a medicinal pump room. In addition, the young people got acquainted with the trail of the Lublin Upland in the central part of the Nałęczów Plateau and the importance of a health resort specializing in the treatment of cardiological diseases. The specific microclimate of Nałęczów positively affects the alleviation of various ailments and improves the overall physical and mental condition.

IMPLEMENTATION OF THE PROJECT ACTION IN THE FIELD OF EDUCATION, TEACHING AND LEARNING DEVELOPMENT OF AN ENVIRONMENTAL AND ECOLOGICAL MAGAZINE IN THE DIGITAL CLOUD 2022/ECOLOGICAL 2022

During the three days of the meeting in Spain, young people participating in the project and facilitators, youth guardians, in the field of education, teaching and learning, gained digital, natural and ecological knowledge, integrated with each other, developed skills and competences in the field of texts and language, text construction, tools and words, writing trends, text forms and uniqueness in texts, outsourcing and crowdsourcing, consumer and brand relations, internet and IT tools in the work of a press journalist, text and graphic work using the following programs: Canva, Gimp and Krita. In addition to the planned journalistic activities, project participants deepened their knowledge in the field of nature and ecology, discovering the resources of Malaga, Ronda, Cortes de la Frontera and Gibraltar.
